

ALL ENLIST E3[®] SOYBEANS LOOK THE SAME EXCEPT AT HARVEST.

The results are in from New York and New England. We could tell you more about our consistent gains, but we'll let the data speak for itself.

PLOT NAME	LOCATION
Chester Martin	Yates County, NY
PLANTING DATE	HARVEST DATE
5/10/2022	10/4/2022

BRAND	VARIETY	YIELD RANK	MOISTURE	INCOME/ACRE	YIELD (BU/A)
Pioneer	P09A62X	17	14.9	\$622	44.4
Pioneer	P09T68E	18	16.4	\$570	40.7
Asgrow	AG13XF0	15	13.7	\$655	46.8
Pioneer	P13T47E	16	13.6	\$647	46.2
Asgrow	AG15XF2	9	13.5	\$780	55.7
Pioneer	P16A84X	10	13.4	\$732	52.3
Asgrow	AG16XF3	13	13.6	\$692	49.4
Pioneer	P18A98X	14	13.2	\$668	47.7
Asgrow	AG17XF2	12	13.5	\$696	49.7
Pioneer	P19A27PR	11	13.4	\$762	50.8
Asgrow	AG18XF1	7	13.3	\$981	70.1
Pioneer	P21A31PR	8	13.7	\$1,016	67.7

SETTING A NEW BENCHMARK.

Asgrow	AG24XF1	3	16.3	\$1,039	74.2
Asgrow	AG25XF3	5	16.9	\$1,002	71.6
Pioneer E3	Average		14.9	\$811	57.9
Pioneer Xtend	Average		13.8	\$674	48.1
Pioneer Plenish	Average		13.6	\$889	59.3
Asgrow	Average		14.3	\$888	63.4

- **Pioneer Plenish had the highest income per acre average with premium factored in**
- **Considerable amount of variability at this site not uncommon in 2022 so be sure to look at data sets across the geography**
- **P21A53E led for A series E3 on yield**

Income/A Advantage is calculated with the price of soybeans at \$X.XX per bushel.

All Pioneer products denoted with TM are brand names.

Data is based on average of <insert year(s)> comparisons made in <insert geography> through <insert date>. Comparisons are against <insert "all competitors" or "any number of products of the indicated competitor brand">, unless otherwise stated, and within +/- <insert ##> RM of the competitive brand. Product responses are variable and subject to any number of environmental, disease and pest pressures. Individual results may vary. Multi-year and multi-location data are a better predictor of future performance. DO NOT USE THIS OR ANY OTHER DATA FROM A LIMITED NUMBER OF TRIALS AS A SIGNIFICANT FACTOR IN PRODUCT SELECTION. Refer to www.pioneer.com or contact a Pioneer sales representative or authorized dealer for the latest and complete listing of traits and scores for each Pioneer® brand product.

Glyphosate
Tolerant

STS[®]
herbicide tolerant trait

Always follow stewardship practices in accordance with the Product Use Guide (PUG) or other product-specific stewardship requirements including grain marketing and pesticide label directions. **Varieties with BOLT® technology** provide excellent plant-back flexibility for soybeans following application of sulfonylurea (SU) herbicides such as DuPont™ LeadOff® or DuPont™ Basis® Blend as a component of a burndown program or for double-crop soybeans following SU herbicides such as DuPont™ Finesse® applied to wheat the previous fall.

Always follow grain marketing, stewardship practices and pesticide label directions. **Varieties with the Glyphosate Tolerant trait** (including those designated by the letter "R" in the product number) contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate.

Varieties with the Roundup Ready 2 Yield® (RR2Y) trait: ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate. Roundup Ready 2 Yield® is a trademark of Bayer Group.

Varieties with the STS® trait are tolerant to certain sulfonylurea (SU) herbicides. This technology allows post-emergent applications of DuPont™ Synchrony® XP and DuPont™ Classic® herbicides without crop injury or stress (see herbicide product labels). NOTE: A soybean variety with a herbicide tolerant trait does not confer tolerance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions and precautions for use.

Varieties with the LibertyLink® (LL) gene are resistant to Liberty® herbicide. Liberty®, LibertyLink® and the Water Droplet Design are registered trademarks of BASF.

DO NOT APPLY DICAMBA HERBICIDE IN-CROP TO SOYBEANS WITH Roundup Ready 2 Xtend® technology unless you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT ON SOYBEANS WITH Roundup Ready 2 Xtend® technology, OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with soybeans with Roundup Ready 2 Xtend® technology. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Soybeans with Roundup Ready 2 Xtend® technology contain genes that confer tolerance to glyphosate and dicamba. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Roundup Ready 2 Xtend® is a registered trademark of Monsanto Technology LLC used under license.

Varieties with Enlist E3® technology (E3): The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies L.L.C. The Enlist weed control system is owned and developed by Dow AgroSciences LLC. Enlist Duo® and Enlist One® herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One herbicides are the only 2,4-D products authorized for use in Enlist crops. Always read and follow label directions. Consult Enlist herbicide labels for weed species controlled.

Plenish® (P) high oleic soybeans have an enhanced oil profile and are produced and channeled under contract to specific grain markets. Growers should refer to the Pioneer Product Use Guide on www.pioneer.com/us/stewardship for more information.

SCN = Resistant to one or more races of soybean cyst nematode.

Pioneer® brand products are provided subject to the terms and conditions of purchase which are part of the labeling and purchase documents. TM Trademarks of Corteva Agriscience and its affiliated companies. © 2022 Corteva. 22D-1292-soybean mailer
